EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. David Upite on June 19, 2006.

The application has been amended as follows:

1) A fabric softening composition comprising: a fabric softening active; and a cationic starch; wherein the cationic starch comprises a weight average molecular weight range of from about 2,000,000 ~~50,000~~ to about 10,000,000 Daltons; wherein the cationic starch is chemically modified to provide the starch with a net positive charge; and wherein the composition comprises a viscosity of less than about 2000 centipoise; wherein the cationic starch comprises from about 2% to about 7% of the fabric softening composition; and
wherein the fabric softening active comprises an ester quaternary ammonium comprising compound.

6) The fabric care composition of claim 5, wherein said composition comprises at least about 10% by weight of the ester quaternary ammonium comprising compound."

Allowable Subject Matter

2. Claims 1-13 and 30 are allowed.

Art Unit: 1751

3. The following is an examiner's statement of reasons for allowance: The closest prior art of record is the reference relied upon in the previous office action. The reference teaches that the use of cationic starches provides much higher viscosities to fabric softening compositions comprising ester quats. As shown in applicant's affidavit, the exemplified cationic starches have molecular weights of about 50,000,000 Daltons or greater; applicant has claimed cationic starches with a molecular weight of 2,000,000-10,000,000. Given the teachings of the reference of the attainment and desirability of high viscosities, applicant's discovery of a genus of cationic starches which exhibit dramatically lower viscosities than the exemplified cationic starches amounts to discovery of an unexpected property.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to the examiner, Dr. John R. Hardee, whose telephone number is (571) 272-1318. The examiner can normally be reached on Monday through Friday from 8:00 until 4:30. In the event that the examiner is not available, his supervisor, Mr. Douglas McGinty, may be reached at (571) 272-1029.

The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8100.
